

CAP WITH A PROTECTIVE VISOR

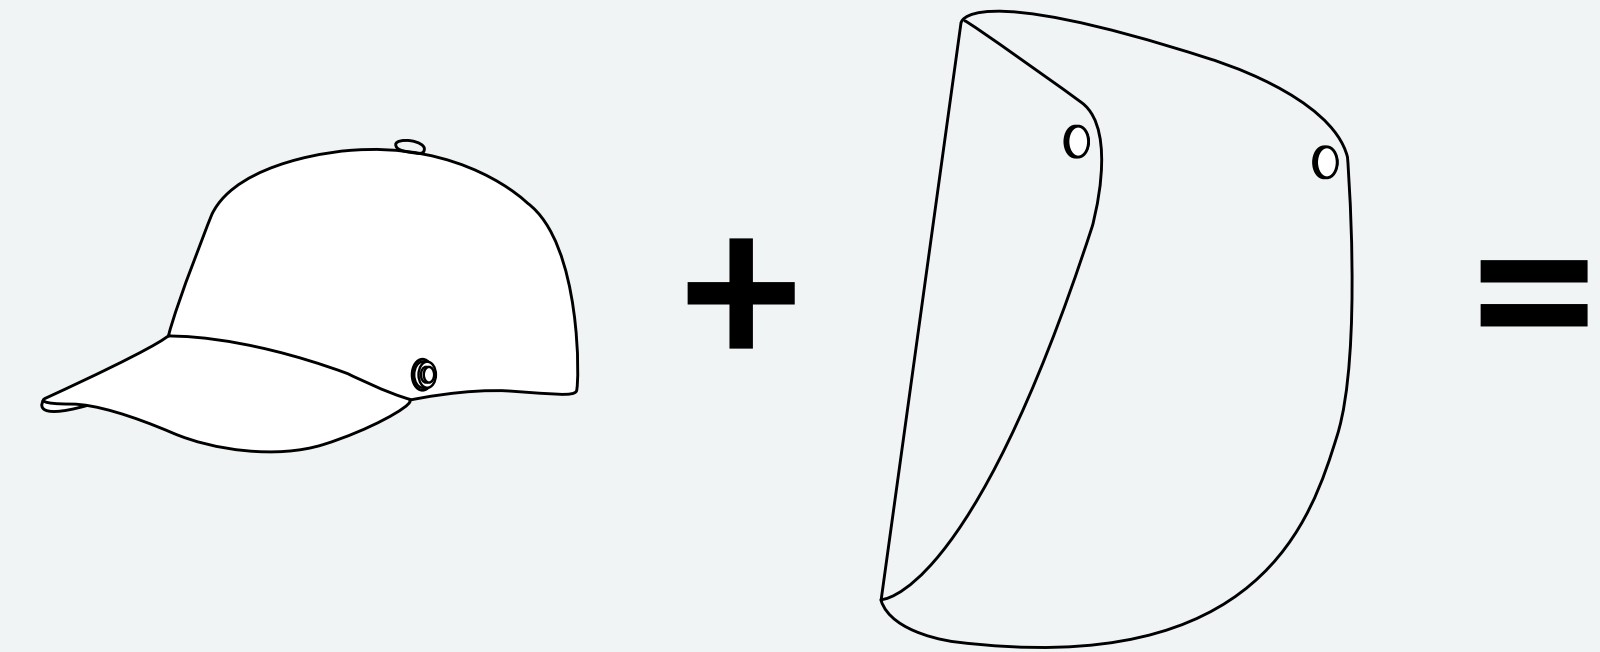

CAP WITH A PROTECTIVE VISOR

- / **Protect your frontline workers.** In these difficult times, employees who are in direct contact with customers are in the most vulnerable position.
- / With the protection and comfort of those employees in mind, we developed personal protective equipment that is functional as well as aesthetic.
- / Protective screens are unaesthetic and intimidating for the customer and offer protection to the employee only when he or she is behind the screen, but not when moving elsewhere. Conventional protective visors become uncomfortable with prolonged use and may cause the feeling of insecurity to the customer.

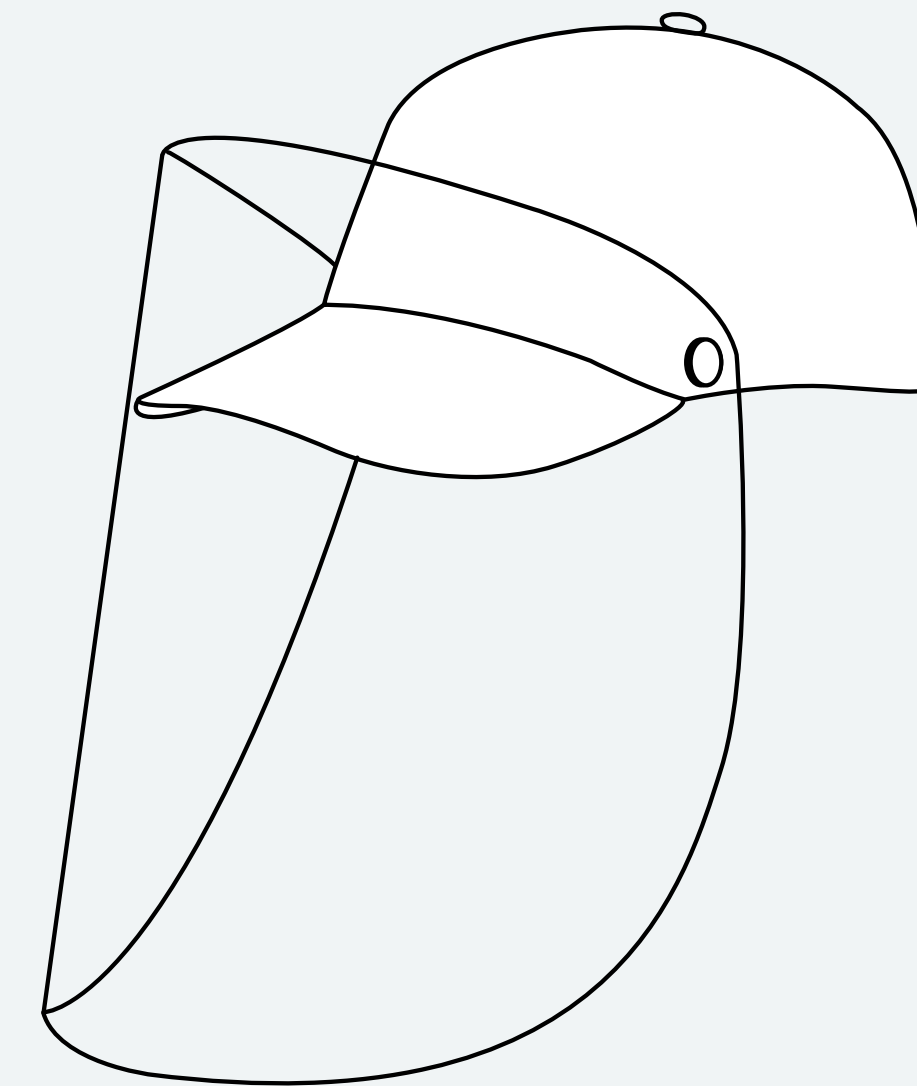

CAP WITH A PROTECTIVE VISOR

/ The product consists a cap with adjustable size (100% cotton) and a visor made of clear glass attached to the cap.

The beak of the cap ensures that the visor is fixed at the right distance from the face to protect and allow sufficient airflow for the user.

CAP WITH A PROTECTIVE VISOR

The cap with a protective visor is:

- / comfortable
- / more aesthetic than similar protective equipment
- / printable

The visor is:

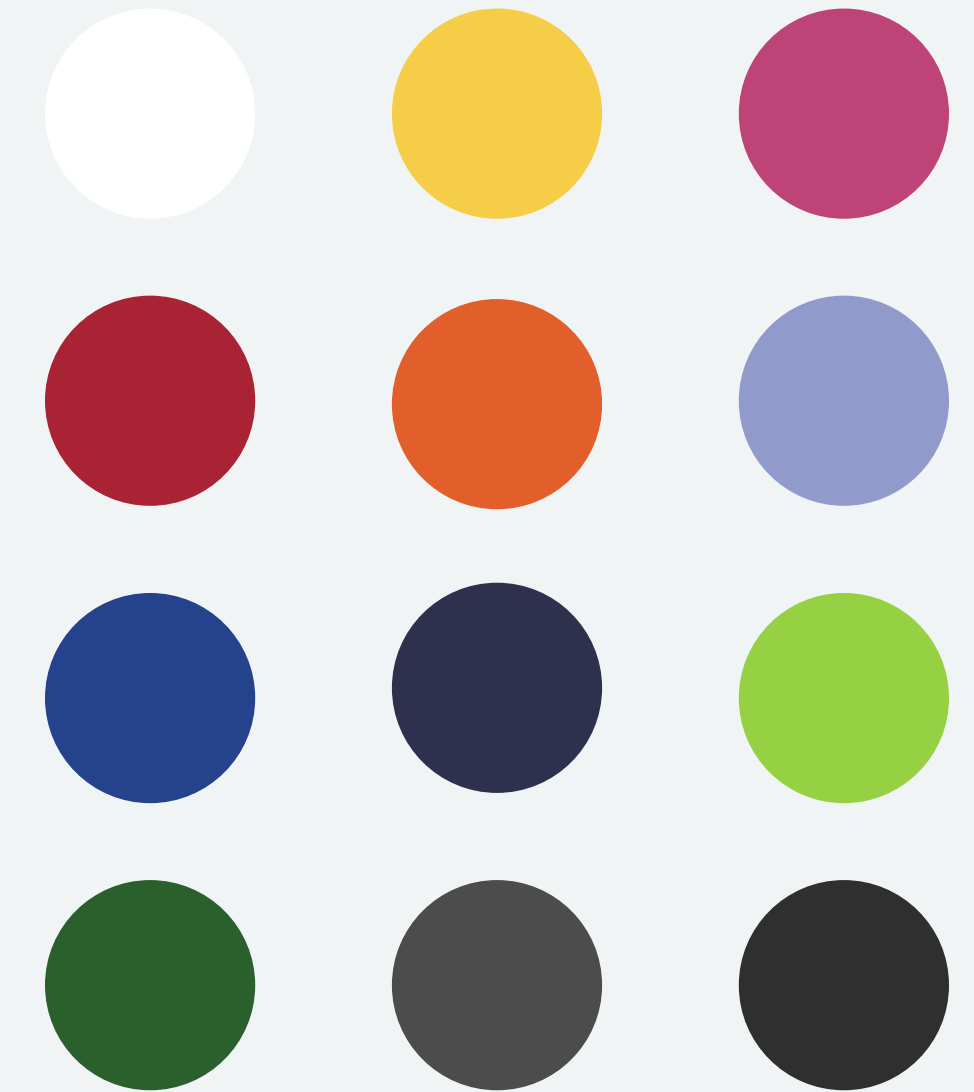

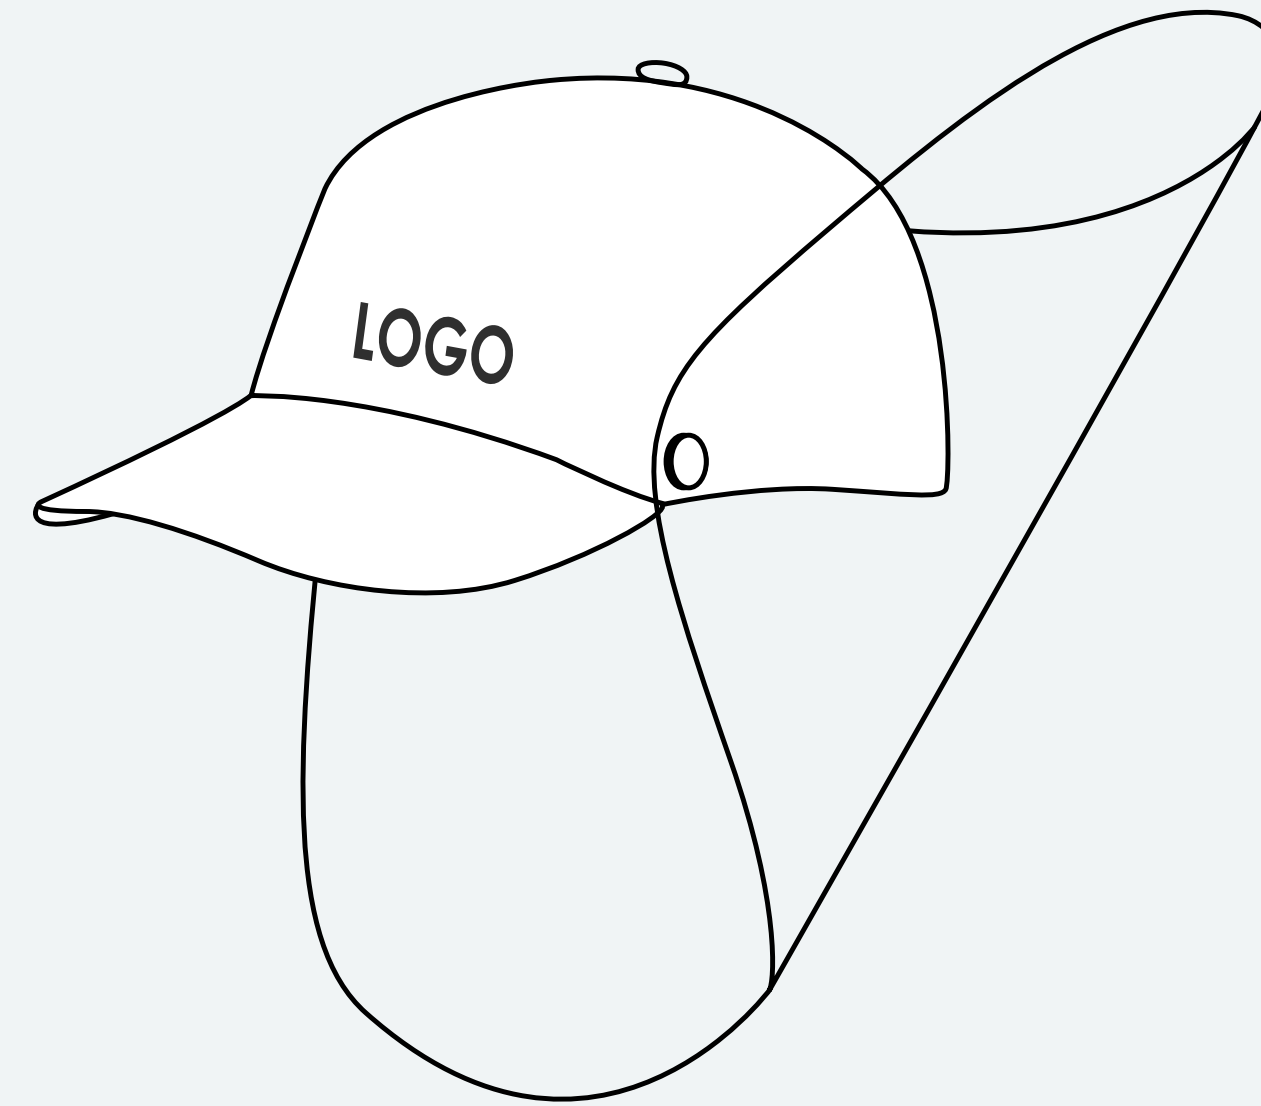

- / movable in 2 positions
- / removable
- / reusable
- / cleanable
- / replaceable
- / recyclable

CAP WITH A PROTECTIVE VISOR

/ Additional visors can be ordered.
The cap can be ordered with the
company's branding, ie printing.

/ The cap is available in **12 different colors**.
